PRESENTATION

Cet imagier a été créé pour faciliter la communication avec des patient(e)s ne pouvant pas s'exprimer oralement (pathologie somatique ou mentale, langue étrangère, etc...).

Quelques recommandations pour une bonne utilisation :

- présenter une illustration à la fois en cachant les autres à l'aide d'une feuille blanche.
- accompagner les illustrations avec des gestes simples, compréhensible de tout le monde,
- pour évaluer la durée des symptômes, une échelle du temps se situe à la fin de l'imagier.

Pour un entretien plus complet, il faudra faire appel à un interprète (langue étrangère ou langue des signes).
